Web Development | Data Analysis | Data-Driven Marketing | Portfolio: <https://babuilds.space/>

Istanbul, Turkey | acisubeyzanur@gmail.com | +90 534 651 6880 | [linkedin.com/in/beyzanur-acisu](https://www.linkedin.com/in/beyzanur-acisu)

PROFESSIONAL SUMMARY: Technical Marketer and full-stack developer with hands-on experience across data analysis, React/TypeScript web engineering, and growth-focused marketing operations. Proven ability to own projects end-to-end, from 190,000-record Python analyses to production-ready web applications, and communicate findings directly to decision-makers. Bilingual (TR/EN), currently based in Istanbul, open to remote and international opportunities.

WORK EXPERIENCE

Freelance Technical Consultant & Developer

Independent Client Projects | Oct 2025 – Present

- UI/UX & Frontend Development (UMass Chan Conference):** Architected the UI/UX and developed production-ready HTML/CSS frontend drafts for the IWW Non-Linear Intelligent Dynamics Conference platform, optimized for academic researchers and institutional attendees.
- Full-Stack Web Engineering (nevyatildirim.com & pedagojikuyku.com):** Built scalable React/TypeScript applications integrated with Supabase backends, dynamic AuthContext authorization, and responsive Tailwind CSS layouts.
- Data & Email Analytics (Global Email Database):** Executed Python-based analysis on 190,000+ records to clean, categorize, and visualize user demographics, business domains, and behavioral intent.
- Legacy System Restoration (globalvision2000.com):** Resolved backend admin lockouts, executed database credential resets, and fixed frontend UI/modal glitches to stabilize core site operations.

Marketing and Business Development Intern

Anadolu Agency, Istanbul, Turkey | February 2026

- Supported the execution of corporate marketing strategies and business development activities.
- Attended cross-functional strategy meetings, synthesized discussion notes into structured internal reports, and delivered documentation to relevant stakeholders.
- Presented personal development projects directly to senior management, generating interest in applied technical approaches to marketing operations.

PROJECTS

Gender Gap in Technology Analysis

Data Analysis Lead (Group Project) | October 2024 – November 2024

- Led an analysis team examining over 30,000 data points using Python and SQL to reveal gender disparities in technical and leadership roles.
- Preprocessed statistical data and designed interactive Bokeh dashboards to visualize gender representation trends.
